

FUNDSPRO Fact Sheet

More transparency, effectiveness, security and predictability for aid-projects worldwide.

FundsPro® meets the needs of humanitarian aid organisations perfectly - no matter the size or area of operation of the organisation.

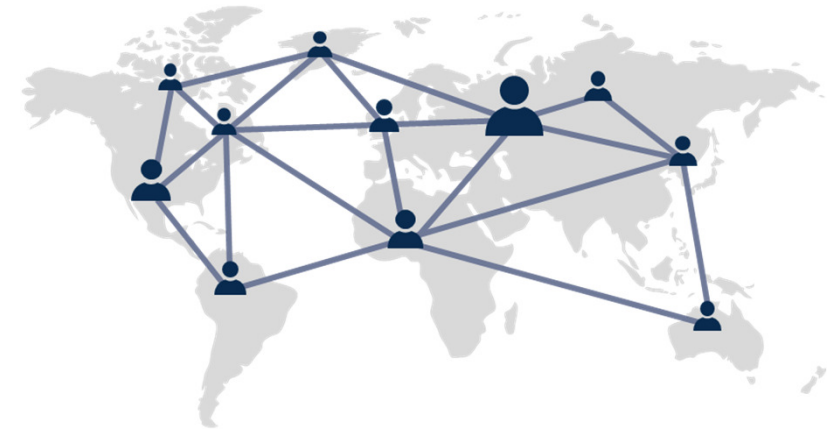

FLEXIBILITY

FundsPro® adapts to your requirements and enables easy integration of new territories and consortium partners to your network, regardless of financing, application or implementation strategies of your projects.

AVAILABILITY

All FundsPro® features are fully available online and offline. The headquarters and the field operate on the same level. Many languages are available in the system for worldwide use.

TRANSPARENCY

Know what is needed when & where. Whether employees, material or funds - with FundsPro® you know your requirements. All parties have access to all relevant information in a uniform format at all times - this provides clarity and transparency.

RELIABILITY

Regardless of local conditions, FundsPro® is fully operational and proves to be an effective tool for active project bookkeeping. Proper accounting is ensured whether or not Internet is available.

EFFECTIVITY

Intuitive use, logical workflows and automated reports save precious time. For planning, approval and reporting, donor formats and guidelines are the basis in FundsPro®. Complex reports are automatically generated in donor specific formats and rework is unnecessary.

SECURITY

Accurate project status at the push of a button provides security in planning, implementation and reporting. FundsPro® creates an overview at all levels - from bank account balances for individual projects to organization-wide liquidity planning.

GRANT MANAGEMENT

Simplified application for funds and automated project structures for different donors ease the grant management in FundsPro®. Procurement plans and activity overviews for implementation partners are created at the push of a button. Scheduling for projects enables activity and milestone scheduling with automatic notifications via e-mail.

ACCOUNTING

Booking vouchers is intuitive and user-friendly in FundsPro®. Predefined business transactions and an input assistant that signals the accuracy of an entry helps prevent errors and eases the use. This saves the helpers time and effort for training and organization.

FundsPro® reduces administrative expenses and helps plan, utilize and report donations accurately and effectively

The software for Financial Planning, Controlling, and Reporting for Non-profit Projects.

INTEGRATION

FundsPro® can be used as an individual solution and as an add-on to larger ERP systems. It is a turnkey solution for SAP systems. Costs for implementing FundsPro® are hereby kept to a minimum.

CURRENCIES

Straightforward currency handling with flexible settings. Up to 4 different currency types with adjustable conversion rates can be included per project in FundsPro®. From contract and local currency to reporting and transaction currency.

AUTOMATION

Working with FundsPro® saves time and is reliable due to automated processes. All relevant functional areas, such as log frame and budget planning have been refined with automated functions that are based on donor guidelines and requirements. Time consuming rework is reduced and complete as well as accurate reporting for consortium partners and donors is secure.

REPORTING

FundsPro® makes reporting safe and efficient with automated processes. It generates reports automatically in donor specific formats. The integrated dual-control principle ensures that only double-checked documents are included in the reports.
